About Quest Integrity Group

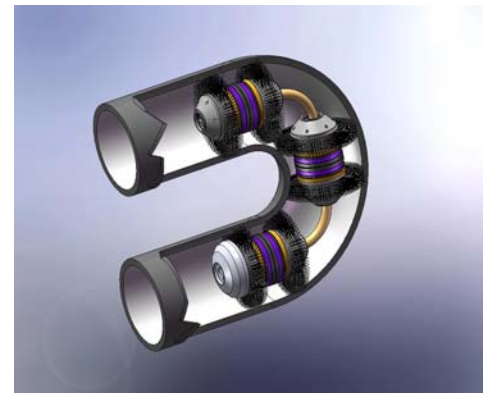

Quest Integrity Group provides advanced measurements, performance modeling, process solutions, and remaining life/fitness-for-service assessment solutions to the global refining, chemical, gas, and power generation industries.

Who Should Attend?

- Plant Inspectors
- Mechanical and Reliability Engineers
- Safety Engineers and Risk Managers
- Asset Integrity Managers
- Metallurgists
- Engineering Management
- Operations Management
- T/A Planning Managers
- Purchasing Managers

About the Seminar

This seminar will introduce advancements relating to state-of-the-art intelligent pigging technology, with proven success in addressing inspection challenges for both *pipelines* and *serpentine coils in fired heaters*. In addition to

inspection of these assets, the technical discussions will also encompass Quest's unique engineering assessment capabilities, which provide rapid Fitness-for-Service and Remaining Life Assessment evaluations, utilizing 100% of the inspection data. These inspection and assessment applications allow cost-effective, mechanical integrity management decisions to be made.
