

Intelligent Pigging & Fitness-for-Service for *Nonpiggable Pipelines*

Intelligent Pigging & Remaining Life Assessment for *Fired Heater Coils*

Register Today!

Quest Integrity Group invites you and your colleagues to attend two FREE half-day, back-to-back technical seminars. Due to current travel and time constraints, we will bring the technology directly to you.

Seminar Schedule

Kuwait
27 October, 2009

Doha, Qatar
28 October, 2009

Abu Dhabi, UAE
29 October, 2009

Yanbu, KSA
1 November, 2009

Dammam, KSA
3 November, 2009

Al-Jubail, KSA
4 November, 2009

About Quest Integrity Group

Quest Integrity Group provides highly accurate, technologically advanced inspection and assessment solutions that help companies in the process, pipeline, and power industries improve operational planning, increase profitability, and reduce operational and safety risks.

Who Should Attend

- Plant Inspectors
- Mechanical & Reliability Engineers
- Safety Engineers & Risk Managers
- Asset Integrity Managers
- Metallurgists
- Engineering Management
- Operations Management
- Turnaround Planning Managers
- Purchasing Managers

About the Seminar

This seminar will introduce advancements relating to state-of-the-art intelligent pigging technology, and will discuss proven success in addressing inspection challenges for both pipelines and serpentine coils in fired heaters.

In addition to inspection of these assets, the technical discussions will encompass Quest Integrity Group's unique engineering assessment capabilities, which provide rapid Fitness-for-Service and Remaining Life Assessment evaluations, utilizing 100% of the inspection data. These inspection and assessment applications allow cost-effective, mechanical integrity management decisions to be made.
